New York Stock Market

treme duliness into which stock trading fell to-day was traceable to the restraining influence of the tightness or the call money market. It is the essumption of the professional trading element that this condition is temperary, and incident to the year end requirements and to be succeeded, consequently by relaxation with the turn of the year. The call loan rate touched the highest of the year and large amounts were placed at the higher rates.

higher rates.

There were occasional responses to-day to favorable dividend developments, the effect being to add to the credence with which rumors were regarded of other prospective increases. Femsylvania responded to the large disbursement to the stockholders of its two subsidiary companies, the Pennsylvania Company and the Pittsburg, Ginebrahi, Chicago and St. Louis, Benef in a special distribution to Reading stockholders seeined to be strengthened. Industrial stocks here and there reflected the hopes of stockholders of increased dividends. There was another resivat of the copper merger story

increased dividends. There was another revival of the copper merger story and that group of industrials showed the effect temporarily.

None of the day's indusences proved permanent in their effect, the traders pursuing an opportunist policy from hour. In view of the uncertain tone of the speculation, some attention was given to reports that railfood officials were admitting some centraction in the volume of affairs. The tone of the market at the close was heavy.
